

Master Your Assets. Everywhere.

Centralized Asset Management for Multi-Location Operations.

Stop searching through spreadsheets and paper records. Gain 360-degree visibility into every piece of equipment your business owns.

The image displays the WorkWizard interface on both a desktop and a mobile device. The desktop view shows a sidebar with navigation options like 'Create', 'Dashboard', 'Tasks', and 'Team Tasks'. The main content area is titled 'Assets' and contains a table of equipment. The mobile view shows a detailed view of a 'PowerX Grill' asset, including an 'Expense Breakdown' and an 'Activity Timeline'.

NAME	IDENTIFIER	BRAND	MODEL

- Repair: Robert Plus · Charbroil · \$500.00 (02/07/2026, 05:00 PM)

ONE DASHBOARD.
COMPLETE CONTROL.

Track Every Detail

Store names, serial numbers, brands, and custom tags in one place. Whether it's kitchen equipment, tablets, or vehicles, know the exact status—available, in use, or under maintenance.

A screenshot of the 'New Asset' form in the WorkWizard application. The form is titled 'New Asset' and has a 'Cancel' button in the top left. It contains several input fields: 'Template' (a dropdown menu), 'Name' (a text input field with a red asterisk), 'Status' (a dropdown menu with 'Available' selected), 'Asset Identifier' (a text input field), 'Brand' (a dropdown menu with 'PowerX' selected), 'Serial Number' (a text input field), and 'Notes' (a text input field). The form is displayed over a blurred background of the application's main interface.

Smart Accountability

Assign assets to specific users, departments, or locations. Eliminate the “where is it?” guesswork and foster a culture of ownership across your team.

The form is titled 'New Asset' and has a 'Cancel' button in the top left. It contains several input fields: 'Template' (a dropdown menu), 'Name' (a text input field), 'Status' (a dropdown menu), 'Asset Identifier' (a text input field), 'Brand' (a dropdown menu), 'Serial Number' (a text input field), 'Notes' (a text input field), 'Assign To User' (a dropdown menu), 'Assign To Location' (a dropdown menu), 'Tags' (a dropdown menu), and 'Attributes' (a dropdown menu). The form is displayed over a blurred background of the application's main interface.

Custom Attributes

Your business is unique. Create custom fields for warranty dates, dimensions, or service intervals to capture the data that matters most to your workflow.

COMPLETE CONTROL.

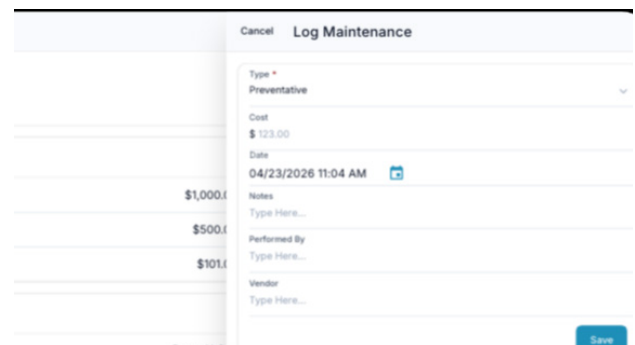

QR Code Integration

Speed up identification with scannable QR codes. Stick them directly on equipment so staff can instantly view maintenance history or update status on the go.

Maintenance & Cost Tracking

Log every repair, inspection, and cleaning. Track service dates, vendors, and costs to identify aging assets before they fail and understand total cost of ownership.

BUILT FOR SCALE

WorkWizard is engineered for the complexity of multi-unit growth, moving you beyond the limitations of site-by-site management. Our centralized system standardizes maintenance and tracks asset transfers across your entire portfolio from a single dashboard. Whether you oversee five locations or five hundred, gain the enterprise-level visibility needed to protect your investments and ensure consistency at scale.

READY TO ELIMINATE DOWNTIME?

Reduce equipment loss. Extend asset lifespan.
Scale with confidence.
